

MD Anderson Cancer Center-University of Notre Dame Summer Undergraduate Research Program

- Competitive 10-week summer research program (Jun 6- Aug 12, 2022)
- Broad range of cancer biology topics, such as quantitative biology, bioinformatics, imaging and technology-oriented research
- Work with world-class cancer biologists

Students receive a stipend of \$6,000 for the 10-week program. It is expected that students will pay for housing and travel from their stipend. In case of in person research not allowed due to COVID, remote options will be available with adjusted stipend.

Students should apply to

ndcollegeofscience.submittable.com/submit/206409/nd-mdacc-summer-fellowship-2021-2022

Required information includes the following:

- ✓ Resume
- ✓ Official transcript
- ✓ Personal statement (expressing motivation for participating in terms of past experiences, current activities and future plans)
- ✓ Explanation of area of research interest
- ✓ Two references letters

All application materials must be received by **Nov 29, 2021**. Students accepted to the 2022 Summer Research Internship Program will be notified by **Dec. 7, 2021**
